

A Wisdom Collaborative Feast: Succoring on the Mystery's Cuisine

Stephen Victor and Margo Kistemaker will work together this season in a project designed for stimulating inspiration, personal power and enhanced awareness.

Intent

The intent of this program is to provide models of thinking as well as behavioral skill sets that help you grow and relate more fully with the nonphysical energetic realities comprising yourself and the worlds you live in. We will work experiential and you will experience expansion of your inner and outer world. The intent behind this is to enable you to more easily

- connect with the greater gestalt of yourself,
- connect with other human beings in more moving ways,
- connect with the energetic realities of Love and Wisdom awaiting you beyond the physical world you know,
- move in ways to re-remember who you are,
- move in ways to re-remember what is important to you,
- move in ways to authentically bring your genuine self to bear creatively and to creatively express your life's intent.

Program

The program will consist of three four-day workshops with Stephen Victor and Margo Kistemaker, and in between Margo will convene three two-day workshops. These workshops are scheduled in the period November 2011 – June 2012.

In the four-day workshops we will work with a broad array of techniques, using all that Stephen has to offer. We will work with constellations and energy work as we did in the workshops Stephen conducted before. Extra to this Stephen will work with all he has brings with him coming from different and supporting techniques. Margo will support this at moments with whatever is needed, and will provide for translation.

In the two-day workshops with Margo the focus will be on energy work and self healing techniques, as well as learning how to perceive and work with the nonphysical energy fields as they appear in our lives. We will work with themes and questions that came up during the four-day workshops in order to integrate the work we did. The two-day workshops will be complementary to the four-day sessions.

Next to participating in these six workshops we ask the participants:

- To begin or continue a practice, some activity, that trains your attention. For example: music, dance, yoga, Chi Kung, Tai Chi.
- To start or continue a personal creative expression: writing, poetry, cooking, singing, making music, basket weaving, anything that calls on your creative expression.
- To sort out what your path for spiritual growth is, and to go deeply in it for the long run. The Mystery asks something of us, we have to answer it. Choose one path to walk.

In between workshops Margo is available for questions and guidance, by email or phone, or with individual sessions if needed.

Teachings

Stephen Victor draws on his work in Hellinger's Family, Human Systems and Movements of the Soul Constellations. He conducted a three day constellation workshop in The Netherlands in 2009, 2010 and 2011. People that attended these workshops experienced his intuitive skills, his superb craftsmanship and his warm and open heart. Working with Stephen is a life changing event.

In this program Stephen will work with everything he has to offer: Constellation work, as well as NLP, hypnosis, conflict resolution, Andean Mysticism, Poetry, Bohm's Dialogue, and Fields of Grace® (Systems of the Human Heart, Constituencies of Self Constellations, Constellating Moments of Grace). Most important is that Stephen did his own developmental work in personal and spiritual growth.

Margo Kistemaker draws on her knowledge and experience that developed during her studies and her individual and group guidance in energy work, healing and energy reading. Her main inspiration is the Andean mysticism and energy work, which she has been working with and teaching since 2003. She studied psychology, graduated as counselor, is a specialist in guiding people through stress and burn-out to a more healthy way of living, and has a broad array of techniques available for learning how to experience, perceive and handle the subtle energies of the nonphysical reality, connecting this to and integrating with daily life experiences. She is trained in healing techniques, stress counseling, body work and relational therapy, as well as psychopathology and science.

Biographies

Stephen Victor

has been providing teaching and consultancy services for 29 years to individuals, private gatherings and associations, governmental and business organizations. He works in the USA, the EU, the Near and Middle East and Australia. His focus is the bringing of oneself to bear creatively in consort with Wisdom and universal intelligence individually, cooperatively, collectively. Stephen is in his nascence stage as a poet and writer; he lives in the Pacific Northwest region of the US with his partner Valerie. He has begun sculpting wood.

Stephen, while being an ordinary man, is uncommon and extraordinary in his thinking, approach to change, creativity and "how" one unfolds life, work and business endeavors. Although the results of those he has worked with are strongly credentialed in themselves, what he says about himself is: "I get up when I fall; my credentials are what you see, hear and feel in my presence – and how you change as I work."

Margo Kistemaker

is psychologist (MSc) and has worked in the scientific tradition of Psychology for a number of years. This background taught her a sober, grounded and positively critical approach in the for many elusive field of energy work, healing and reading. She began her work in intuitive development, (self)healing and reading in the 1980's, based in the approach of CIO, the Centre for Development of Intuition. Since 1995 Margo teaches in her own school a four year educational program in energy work, healing and energy reading. The program aims for personal and spiritual development and growth and is since 2004 based on working with the tools the Andean tradition provides. Next to this work she sponsors workshops for the Andean mystic and teacher Juan Nuñez del Prado, the American author of the Andean tradition Elizabeth Jenkins, the Mexican Toltec teacher and healer Sergio Magaña, and last but not least she sponsored several workshops for Stephen Victor. From this Margo and Stephen developed a project in which they work together, to bring people forward in their personal and spiritual process.

Margo lives in a town near Amsterdam with herself and two cats. She paints and writes.

Participants

Our intent is to form a group that will stay together for a year, working in this program. You will learn different techniques for personal growth and will develop a lot of skills. "Standing by the drum" you will eventually learn how to work yourself with these techniques, in an intuitive way, in contact with the fields of Love and Grace.

People who want to find out how this program works for them can register for the first two workshops, a four-day with Stephen and Margo and a two-day with Margo following the first one. After that you can choose to go on or not.

When there is space still available, the workshops are open for participants that register only for that workshop. People who register for the complete program, however, will be given first access.
